How the Barcamp function?

„Bar“ is term of computer science for Placeholder. In oder to undstand the term: Barcamp is a place for yours` topics to be shared.

And the ideas collection start after the obligatory Know-How ("open-space method") for the individual sessions. You people decide when, where, which session takes place and You people decide in which session you want to attend.

So your ideas are perceived by others, give others something in his hand. Whether film, poster, poem or artwork. You have for that premises, equipment and materials. Your method is the right one.
